# NEWS AND NOTES

A Summary of Important Events. FIFTY-FIRST CONGRESS.

an the Senate, on the 8th, the conference report on the River and Harbor bill was agreed to. During the debate on the Tariff bill, Mr. Plumb, in the course of remarks in support of his amendment placing a tax of \$1.25 on distiled spirits expressed the belief that under the bill there would be a deficit of \$50,000,000. The amendment was rejected, yeas, 17; nays, 39. The finance committee amendments to the sugar schedule were adopted, the vote on the rate of sugars above No. 13 Dutch standard being 39 to 12. An evening session was held with a view to disposing of the remaining amendments ..... In the House the day was spent in discussing the Atkinson bill relating to railroads in the District of Columbia. For want of a quorum no

In the Senate, on the 9th, the Aldrich reciprocity amendment to the Tariff bill was adopted, 38 to 29, and the amendment of Mr. Plumb for the appointment of a permanent customs commission of five to investigate THE German Minister of Commerce the tariff question was agreed to, 31 to 29. has informed a deputation of Rhenish | The bill was ordered to an engrossment and third reading, 38 to 28, a strict party vote, and the Senate, after a brief executive session, adjourned ..... In the House the entire day was spent filibustering over a proposition to take up the Langston-Venable elec-

tion case from Virginia. In the Senate, on the 10th, concluding speeches on the Tariff bill were made by Senators Hoar, Hiscock, Turpic, Vance, Gibson and Jones (Nev.) At 5:20 p. m. a vote was taken and the bill was passed, 40 to 29-a strict party vote, Mr. East's being the only Senator who was not recorded on the measure either by vote or by pair .... In the House the entire day was spent fillibus-tering on the question of approving the journal, the object of the obstructionists being to prevent consideration of the Lang-

ston-Venable election case. In the Senate, on the 11th, after the trans. action of some routine business the conference report on the Land Grant Forfeiture bill was taken up. Mr. Morgan took the floor and spoke four hours in opposition to the report, but had not finished when the Senate adjourned......In the House, for lack of a quorum, shown by the first rollcall, adjournment was had at 12:35 p. m., without making any progress whatever with the Langston-Venable contested elec-

In the Senate, on the 12th, Mr. Morgan delivered the concluding argument in opposition to the conference report on the Land Grant Forfeiture bill, and Mr. Sanders made the opening argument in support of the report, but the body adjourned without action on the report .... In the House the Tariff bill, with Senate amendments, was received, and, by direction of the Speaker, was referred to the committee on ways and means; but for lack of a quorum no busi ness was transacted, and the House, at 1:55 p. m., adjourned.

#### A CATTLE EPIDEMIC.

Words of Warning from the State Veterinarian-Missouri Cattle May Possibly be Afflicted with Foot and Mouth Disease -No Present Cause for Alarm-How to Meet and Check the Malady When it COLUMBIA, Mo., Sept. 5.-State Vet-

FOOT AND MOUTH DISEASE.

lication the following circular:

At the outset I beg the stockman not to be alarmed at this heading and the newspapers not to raise a scare by partial explana-tions of this letter or inaccurate descrip-tions of the disease I am about to explain, or by partial explanation of my opinion. Heretofore much damage has been done our live-stock men, farmers and our mar-ket centers just because of rash, un-justifiable, incorrect publications, and by ridiculous excitement, aided, perps, by unscrupulous speculators, me years ago a panie was created the live-stock centers because an outbreak of ergotism in Kansas which had been termed foot and mouth dis-ease. The error was very unfortunate, but had there been no error, and had it been the foot and mouth disease of Europe, why such excitement? It is the mildest epi-demic of stock known, and the death rate define of stock known, and the death rate scarcely rises to 10 per cent. in the most virulent outbreaks and not 12 per cent. in the ordinary. The only serious damage that it does cause is in reducing the flesh and stopping the milk. Here it does hurt to the amount of several dollars per head. It is to prevent such possibilities and limit the trouble that I write and explain publicly a new prevents. a now prevalent malady attacking the mouth and feet of cattle in several counties in our State, and creating consternation mong farmers and stockmen.

My object is to explain what to do, and I emphatically declare that there is absolutely no need of alarm in the slightest degree. Now if some wise man or knowing character does not feel called upon to scare the people, all will be benefitted who are suffer-

ing and none will suffer was are free.
The State Veterinary Department would attend to all the outbreaks silently, if it were possible, and none would hear of the matter until official reports are published. It is our policy to destroy all contagion and infection quietly and without publication But in this instance we are taxed beyond our capacity. The demands for advice are too frequent and the trouble too much scattered, and erroneous notices have already been published. We can benefit all and the whole State only by general public work.

I respectfully request every paper of this
State to copy this in full-preface and all-so that every community may be informed of its duties and now to prevent losses. IT IS A MOUTH AND FOOT DISEASE.

There is a disease now prevailing among cattle in several counties in which blisters break in the mouth, particularly about the lips and gums. The cattle appear gaunter and gauster day after day for want of food. If examined the nose may be found hot, dry and sometimes wine color in patches. Blis-ters appear on the inside and on the margia of the lips, which become more or less raw, and bleedeasty. The pad (upper jaw gum corresponding to the front teeth of lower jaw) also presents blisters, which soon break, form a thick, yellowish, cracked, soft crust, Sometimes the tongue is blotched or blistered but rarely. There is much drooling of stringy, watery matter from the mouth, and the odor from it if any thing but agreeable—often very fetid, indeed. Those vel-lowish crusts slough out after a few days and leave raw su faces or sores. In a few cases complications arise by which gangrene (rotting in fact) of the gums extend to the faw-bones or teeth, and in few in-stances the teeth becomes loose and even

There is often present a peculiar smackor of the lips. Most of cases become stiff and lame from the same lesions breaking in the feet (the cleft particularly). Occasionally, also, blisters and consequent results (scabs, crusts and even raw sores) occur on the udder. In three or four cases I know these appeared on the neck, the belly, the back and about the root of the tail. Uncommonly there is diarrhea. The mainly runs its regular course in an average of about eight days. The shortest course I have noticed was five and the longest eleven. There are irregular or complicated cases which last much longer. Fever, more or less intense, keeps up most of the time. The type is very mild, death rate being, so far as I can learn, less

PREVENTIVE AND CURATIVE TREATMENTS. Separate all the sick and suspicious from the healthy stock-leaving the former where the disease began and putting the healthy in a new pasture or lot.

2. Wash the mouth twice a day with a solution of borax or alum, or both combined, i. e., a wash composed of, say, a tablespoonful or more of pulverized borax and alum to a

pint of water. Watch very closely the healthy stock, appears, or as any suspicious symptom may fullness, dry nose, difficulty in taking food, 4 Persons attending to such diseased stock should not visit pastures or places occupied by healthy stock, whether on their own

operty or at their neighbor's; and all who ave healthy stock should abstain from visiting diseased stock. iting diseased stock.

5. Buckets and other articles used for diseased stock should not be used for any thing else unless washed and scalded.

6. Stock from infected herds should not be shipped to market or moved from the in-fected grounds, and none should be allowed highways.

7. It is prindent to keep sheep and perhaps swine away from the infected herds.

8. Persons with sores or chapped hands should handle the disease carefully and wash clean after dressing cases
It will pay to follow strictly all these measures of precaution. Some of them may appear unnecessary, but they all are based on rational hygienic principles that should not be transgressed. In bad or complicated cases, in which the feet are much affected, a fally wash with a copperas solution will be great assistance Feed. The lips usually become so sore that he cattle can not pick any food. That is what causes such extreme gauntness and

alling in flesh as characterizes the malady. When death occurs it is rarely due to in-ernal lesions, but seems generally caused chiefly by starvation during the fever. To avoid such results feed the stock gruel and push ears of corn into the mouth directly push ears of corn into the mouth directly under the grinders, when the patients will chew them and eat. Now, is this the European foot and mouth disease? I confess I am not yet positive, though it corresponds exactly with authoritative descriptions of it. But this much is certain, it is an epidemic affection of the mouth and feet in cattle, and it is new to me. I know it is neither simple aphtha nor simple eczema nor ergotism. I am nor simple eczema nor ergotism. I am familiar with all these. We are now en-gaged with tests with a view to solve the question of infection and contagion, but we icem it necessary to instruct the people at once and not wait for the results of these experiments. The number of letters received concerning this disease precludes the possibility of official visits to all, so it is urged that stock owners follow the directions given here and

arantine their own diseased stock. They will find it profitable to themselves and Any citizen having this affection among his herd will kindly report to me at once, giving their township, county, nature of e, number of cases, number of deaths and stating if any other animal than cattle

took the disease.

Again I ask all papers interested in the welfare of their community to please copy
'n full.

PAUL PAQUIN,
Missouri State Veterinarian. Fatally Injured by Dynamite.

Canaseraga, N. Y., Sept. 6.-James Curry, a farmer, was fatally injured by the explosion of dynamica cartridges, which he was using to take up stumps, yesterday afternoon. His right hand was torn off and his left arm shattered.

#### THE EASTERN FLOODS.

Continuous Rains and Consequent Floods in the Canisteo and Coshocton Valleys in New York Cause Thousands of Dollars' Worth of Damage and Bring Busi-

ness to a Standstill. ELMIRA, N. Y., Sept. 11.-The flood nere last night has done thousands of erinarian Paquin has prepared for pubiollars' worth of damage in the Chenung, Canisteo and Coshocton valleys. The Chemung river is not now rising, and the worst is over. The Inter-State Fair grounds are flooded with three feet of water, and the loss to the managers through damage to the exhibits alone is incalculable. Charles Townsend, of Addison, made a wager that he could swim the river last night, and instantly plunged in. His body has not yet been found. The water in the Canisteo river is the highest known in twenty-five years. Corning, Addison and Hornellsville are inundated, and business is at a

standstill. Reports from Bath say that the Coshocton valley is submerged and the loss of property is very great. Railroad traffic is entirely suspended on the Erie and Delaware, Lackawanna & Western roads. West of here many bridges have been swept away. The road bed is washed out and at various places along the road several feet of water cover the tracks. The Northern Central is not running farther than Watkins, and traffic on all the roads entering the city is seriously delayed. The roads can not be opened before to-night or to-morrow at the earliest.

DANSVILLE, N. Y., Sept. 12.-The severe rains of the past twenty-four hours have caused the Canaseraga to overflow on the flats, so that the crops not yet gathered will be entirely destroyed.

THE BARRUNDIA KILLING.

The Declaration of Captain Pitts of the Steamship Acapulco Makes it a Case of Self-Defense, Barrundia Having Fired CITY OF MEXICO, Sept. 12.-Advices received here respecting the shooting of General Barrundia on board the

American steamship Acapulco at St. Jose de Guatemala, state that Captain Pitts of the Acapulco had made a declaration which, the Guatemalan authorities claim, completely justifies their action. Mr. Mizner, the American Minister, the authorities say, was consulted as an act of courtesy only. It is further alleged that when Captain Torielle and Captain Pitts read to Barrundia the order for his delivery to the Gutemalan authorities Barrundia asked permission to change his clothes, which was granted. Turning away, Barruntia suddenly grasped two revolvers and dred on Torielle, Pitts and the policemen, who, in turn, fired on Barrandia, killing him. Captain Pitts had taken the precaution of crdering the passengers to withdraw, otherwise some of them would have undoubtedly been hit by the bullets from Barrundia's pistol.

#### TOO INTENSELY BRITISH.

A Canadian Militia Officer who Can Not Distinguish a Compliment when He Sees One and Makes an Ass of Himself. TORONTO, Ont., Sept. 11.-Colonel Gray, who is Brigade-Major of the Canadian militia, on Tuesday ordered to be taken down a handsome United States flag which was fluttering from one end of the grand stand at the Industrial exhibition. The act was greeted with mingled cheers and hisses. Manager Hill of the exhibition ordered the flag put back and yesterday morning "Old Glory" was again in place. Major Gray angrily ordered the "Flag of an alien people" to be torn from the flag-staff. This Manager Hill refused to do, saying it was only a graceful compliment to the American people, who every year visit the exhibition in large numbers. The board of directors will to-morrow

## pass upon the question.

VOLCANIC ERUPTIONS. North Carolinians Becoming Alarmed Over the Smoky Eruptions in the Blue

Ridge Mountains. Asheville, N. C., Sept. 11.—Reports received here from reliable citizens in the neighborhood of Bee Tree creek, a tributary of the Swananoa river, twelve miles east of this city, state that for third time since the Charleston earthquake vast volumes of black smoke running to a height of 500 feet has for some days been regularly emitted from the seven mountain peaks of the Blue Ridge chain. An effort is being made to have Prof. C. D. Smith, the geologist of Macon County, and General T. L. Clingman investigate the matter, as many of the people have become so alarmed that they say they will leave the neighborhood.

#### MONEY AND BUSINESS.

The State of Trade, Traffic and Business in General According to R. G. Dun & Co's Weekly Review-A Stiffer Monetary Situation-The Volume of General Business Fairly Satisfactory and Collections Good-Business Failures, Etc.

NEW YORK, Sept. 13.-R. G. Dun &

Co.'s weekly review of trade says: The past week has fully justified those who gave warning that the monetary ease, caused by Treasury disbursements, could be but temporary. The market here has been tight, with extreme rates paid in some cases. At Boston and Philadelphia monetary pressure also affects business. At Chicago the market is somewhat firmer and the demand active; at St. Louis it is stiff at 7 to 8 per cent.; at Kansas City more firm; at Omaha a trifle close; at Milwaukee very active, and to some extent disturbed by a large lumber failure in the interior. At Detroit the demand is strong at 7 per cent. At Cleveland the tightness is rightly ascribed. to the volume of business; at Pittsburgh the demand is fair at 6 to 7 per cent; and only at New Orleans, of all cities reporting. is the market easier. The immediate fright at New York was about supposed enormous demands for payment of duties, if the new tariff should go into effect October 1. The fact, as officially reported, is that less than \$9,000,000 would pay full duties on all goods in warehouse on which the rates have been increased, but no one supposes that the entire quantity would be taken out. The pressure has caused considerable decline in stocks, the average having fallen about \$2.50 per share since August 25. Breadstuffs had not been strong until Thursday, the latest information as to yield being generally more favorable. Lard and hogs were stronger, and the report that cotton was in condition a snade lower than last year caused a rise of a sixteenth with sales of 595,000 bales for the week. The exports of wheat fell far behind last year's, and the decrease in corn is also heavy. Other products have not changed much in price, though oil is 2% cents lower. The reports from other cities indicate no slackening of activity on account of monetary difficulty at any point west or south of Philadelphia. The reports as to collections are almost as uniformly satisfactory. The crops are moving fast, prices encouraging farmers, but do not go forward to consumers as rapidly. At Boston the wool trade is much more active, and at Chicago there is a steady increase over last year in movement of dry goods, boots and shoes, clothing and meats. St. Louis reports strong trade in nearly all lines and from other points the accounts are of similar tenor. The weekly output of iron rises again to 171,-776 tons against 164,798 August 1 and 134,068 a. year ago. The market for pig fron is weaker. Greater activity in woolen manufacture is shown by the rapid rise in sales, and the speedy passage of the Tariff bill is anticipated as a basis for larger operations. The activity in dry goods is everywhere in-creased. The coal trade has done nothing to speak of at August circular prices, and the demand here is below expectations. The minor metals are strong, though for copper the present demand is light. In short, there is every reason to look for a large and prosperous business, if the pres-

sure in the money markets is met. The business failures during the last seven days number: For the United States, 167; for Canada, 26; total, 193; as compared with a total of 203 last week, and 189 for the week previous to the last. For the corresponding week of last year the figures were 193, representing 170 in the United States and 23

TO MEET THE PRESSURE.

The Treasury Department Will Not Hest

tate to Do All that the Law Permits to Relieve the Monetary Stringency-Auxiety Largely Without Foundation. Washington, Sept. 13. - General Nettleton, Assistant Secretary of the Treasury, in response to inquiries on the subject by a reporter of the United Press last night, made the following statement: "The Treasury Department to-day, in addition to its regular disbursements, which are unusually heavy, paid out \$2,348,084 on account of bond purchases and advance interest as follows: Interest prepaid \$1,063,034; redemption of four-and-one-half per cent.

bonds \$535,050; purchase of four-percents \$750,000. "The four-per-cents purchased yesterday were accepted at 125. This is the first considerable purchase of fourper-cents for some time, and the price paid is one per cent. above that heretofore paid under the circular of July 19. It is thought there may be an impression among holders of four-per-cent. bonds that the Government has withdrawn from the market for four-percents. This is not the fact, as the Treasury is ready to take a consideras

ble amount of fours if they are to be "The inquiry instituted yesterday by the Secretary of the Treasury develops the fact that the total balance of duties due on all imported merchandise in bond at the port of New York on September 1 was only \$17,500,000. Only a moderate portion of these goods will be subject to increased duty under the schedule in the new Tariff bill. These facts would seem to indicate that anxiety based on this feature of the situation has been largely without

foundation. "As to further measures of relief, in so far as the existing stringency can reasonable be said to be due to the inevitable operations of existing laws governing the collection and disbursement of the Government revenues, the Treasury Department will not hesitate to apply such effective remedies as the law permits and the situation requires. The Secretary of the Treasury on his return to Washington from New Enconvention spoke two hours yesterday gland will be in New York to-morrow, and will adopt such a course as shall

It is said that one of the minor measuses of relief for the market that may payment in advance of a year's interest on the sixty-five million dollars of

If the Republican managers are convinced that there is any danger of a panic in case goods imported since August are made subject to the new duties if taken out of bonded warehouses before October 1, they may consent to postpone the date another month.

## A Daylight Robber who Objected to His
